(54) CHARACTER INFORMATION PROCESSOR

(57)Abstract:

PROBLEM TO BE SOLVED: To improve the convenience of use functions regarding the address such as the address input function and address printing function by using an address file control table, discriminating the address file from other character string files stored in the same area in a storage means, controlling and editing.

SOLUTION: As address data can be used as an address file to be distinguished from other character string files, register and control. Namely, when an address file processing mode is retained by the operation of address keys of a key input section 11 or the selection from a menu, processing is started by a CPU 21, and the kind of actual processing for the address file is selected and discriminated. When the registration, modification, erasing, copying and printing of the address file are selected respectively, the registration, modification, erasing, copying and printing are carried out respectively. The selection is easy and convenience of use is good.
